

Nguyen Quoc Dai

Software Engineer

Ho Chi Minh City, Vietnam | dainguyen020199@gmail.com | +84-961664550

SUMMARY

Versatile and results-oriented Full-Stack Software Engineer with nearly 5 years of experience in developing scalable, end-to-end web applications. Specialized in modern front-end frameworks like React.js and Next.js 14, alongside back-end technologies such as NestJS and PostgreSQL. Adept at building high-performance, responsive interfaces, integrating RESTful/GraphQL APIs, and optimizing UI/UX across devices.

Proven experience delivering data visualization platforms, CMS-integrated systems, and healthcare applications. Strong team player with a proactive mindset, attention to detail, and a passion for clean, maintainable code. Comfortable with agile environments, mentoring junior developers, and managing the full software development lifecycle from architecture to deployment.

Data Visualization Experience: Over 1 year of hands-on experience with charting libraries including Highcharts, Highcharts Stock, ECharts, and ApexCharts. Strong expertise in customizing and optimizing visualizations for clarity, interactivity, and storytelling.

Career Objective: To grow into a senior engineering position where I can lead complex technical initiatives, mentor high-performing teams, and contribute to building impactful, user-centric products that solve real-world problems.

TECHNICAL STACK

Languages: TypeScript, JavaScript, SQL, C#

Front-end: React.js, Next.js, Redux Toolkit, Recoil, Tailwind CSS, SCSS

Back-end: NestJS, Express.js, ASP.NET

Mobile: React Native

Databases: PostgreSQL, MySQL, SQL Server

UI Libraries: Ant Design, MUI, Shadcn

API & Communication: RESTful API, GraphQL, WebSocket, Socket.IO

Testing: Unit Tests, Jest, Postman

DevOps: Docker, Nginx, Linux, GitHub Actions

Others: Git, Firebase, Kafka, Jira, Figma, Zeplin, Postman, Storybook, Jest

Language: English (communicate), Vietnamese (native)

PROFESSIONAL EXPERIENCE

Vietstats Co., Ltd (September 2023 – Present)

Vietstats Corp is a platform dedicated to providing and visualizing economic data in Vietnam, aiming to help journalists, experts, businesses, and the public easily access, analyze, and leverage economic information quickly and accurately

portal.vietstats.vn – is a data-as-a-service platform developed by Vietstats that enables users to configure and embed interactive charts into external systems such as news portals, enterprise websites, and content management systems (CMS) like WordPress, Node.js, or Java-based platforms.

Role: Full-Stack Developer

- Developed a data visualization platform for configuring and embedding charts into external platforms such as WordPress, Node.js, and Java-based CMS
- Designed scalable system architecture and database schema
- Built dynamic front-end interfaces using React.js and Next.js 14 App Router
- Created secure, reusable REST APIs with NestJS and PostgreSQL
- Enabled data-driven storytelling for media companies and enterprises
- Deployed platform with Docker and Nginx in a production environment

Technologies: TypeScript, Next.js 14, NestJS, PostgreSQL, Firebase, WebSocket, Docker, Nginx

vietstats.vn – Data-as-a-Service platform offering industry-level datasets.

Role: Full-Stack Developer

- Designed system architecture and database schema aligned with business logic
- Developed RESTful APIs with NestJS and PostgreSQL
- Built responsive, modern UI using React.js and Next.js 14
- Mentored interns and junior developers; performed code reviews
- Configured production servers and deployed services using Docker and Nginx

Technologies: TypeScript, Next.js 14, NestJS, PostgreSQL, Firebase, WebSocket, Docker, Nginx

Doctor Check JSC (March 2021 – August 2023)

Doctor Check JSC is a healthcare service provider with a mission to digitize and optimize medical processes. We focus on applying technology to improve diagnostic efficiency, enhance patient experience, and contribute to building a smarter, more transparent, and accessible healthcare system for everyone.

Doctor Check CRM – a web-based system for managing customer relationships across online channels.

Role: Frontend Developer

- Built and maintained key modules for customer relationship management
- Integrated real-time chat (Facebook, Zalo), customer insights, and messaging tools

- Wrote unit tests and collaborated closely with the back-end team

Technologies: React.js, TypeScript, Redux-toolkit, WebSocket, Firebase

Zalo Mini App – a lightweight healthcare app integrated into the Zalo Super App for patient interaction.

Role: Frontend Developer

- Developed a mobile app on Zalo Super App for appointments, test results, and promotions
- Led UI/UX design and implementation; deployed app to production
- Authored documentation and user guides

Technologies: React.js, TypeScript, Firebase, WebSocket

Doctor Check HIS – internal system for healthcare staff to manage appointments and patient records.

Role: Frontend Developer

- Enhanced internal tools for doctors and nurses (appointments, health records)
- Migrated modules from view engine to modern SPA architecture

Technologies: React.js, Next.js, MUI, WebSocket

Doctor Check Portal – a customer-facing web portal for health checkups, reports, and billing.

Role: Full-Stack Developer

- Built a customer-facing portal for viewing health checkups, reports, and invoices
- Developed APIs and integrated front-end with back-end services
- Optimized performance and deployed system to production

Technologies: Next.js, NestJS, SQL Server, Redux-toolkit, Ant Design

EDUCATION

Ho Chi Minh City Industry and Trade College

Bachelor's Degree in Information Technology (2018 – 2021)

ACHIEVEMENTS

- Top 15 National Finalist – Startup Kite 2021
- National Encouragement Award – AI-based smart attendance system with automatic temperature detection

CERTIFICATION
